ABOUT ME

I'm a young Computer Systems Engineer, specializing in multiplataform applications, with one year of professional experience as a Junior Full Stack Developer. My focus on application development translates into solid skills, unwavering dedication, and active participation in large-scale projects. My ability to communicate effectively and work collaboratively has allowed me to achieve satisfaying objectives and deliver excepcional results. My passion for continuous learning and ongoing self-improvement is reflected in my eaferness to grow, offering fresh perspectives and innovative approaches despite my youth. My commitment is to deliver outstanding results and foster the potential of those around me in any development team.
